

The Ultimate Flat-Pack Furniture Assembly Planner

Plan your furniture delivery, room preparation, assembly schedule and post-installation checklist before the installer arrives. Highly optimized for desktop print or digital mobile reference.

1. DELIVERY & LOGISTICS LOG

Furniture Brand & Items	
Delivery Window / Date	
Installer Appointment Time	

2. ROOM PREPARATION CHECKLIST (PRE-ARRIVAL)

- ☐ **Measure Ceiling Clearances and Spatial Margins**
Confirm that tight vertical ceilings clear the diagonal profile of tall wardrobe frames [cite: 2, 10]. If clearance is under 1cm, frames must be built vertically standing up [cite: 1, 10].
- ☐ **Establish Flat Footprint Work Perimeters**
Clear the room layout completely [cite: 9]. Lay the cardboard delivery boxes flat across the footprint to act as built-in floor surface shielding against scratches [cite: 7, 11].
- ☐ **Perform Active Utility Safety Sweeps**
Scan the mounting partitions with an electronic multi-detector to map out hidden cable grids or active pipe water systems before drilling brackets [cite: 2, 8, 10, 12, 14].

3. STRUCTURAL ASSEMBLY & LEVELING PLAN

- ☐ **Verify Base High Point Shimming Metrics**
London floors are notoriously unlevel [cite: 1, 18]. Locate the sloping high point with a level, and use feet shims early so total weight shifts safely backward, never forward [cite: 18].
- ☐ **Examine Chassis Squareness Diagonals**
Measure corners diagonally from edge to edge before nailing backboards [cite: 14, 16]. An unsquared chassis creates permanent torque that distorts tracks and doors [cite: 14, 16, 17].

4. POST-INSTALLATION STABILITY VERIFICATION

- ☐ **Inspect Heavy-Duty Wall Anchoring Anchors**
Confirm that anti-tip constraints for all units over 75cm high are anchored securely to solid wall studs or masonry rather than weak hollow drywall [cite: 10, 13, 14].
- ☐ **Validate Interlocking Drawer and Rail Movement**
Test glides and hinges [cite: 14]. Drop heavy storage to lower compartments to optimize a safe center of gravity and counter forward tipping hazards [cite: 13, 14, 17].

 **The Italian Tasker's Fixed Pricing & Safety Promise:**
Furniture stability requires professional precision. Our guaranteed fixed-rate quotes fully bundle all spatial squaring checks, floor leveling adjustments, and heavy-duty structural anchoring standard—removing on-site hidden cost surprises [cite: 20].
